Injected white and flicker levels sit inside the recovered distribution
(a) recovered white
injected
median 1.90
n = 999 component series
WN IQR 1.39--3.67 mm
FN IQR 1.61--5.74 mm
component series
white noise σ_{WN} (mm)
(b) recovered flicker
injected
median 2.26
component series
flicker noise σ_{FN} (mm)
(c) recovered random
injected
median 10.29
component series
random walk σ_{RW} (mm yr$^{-1/2}$)
